

# JEWBLE

The Meta-Pet Evolution

Where emotional resonance meets algorithmic depth.

IDENTITY IS NOT ASSIGNED; IT IS SEQUENCED.

DYNAMIC INTERACTION MODEL: FEEDING, CLEANING, PLAYING,  
SLEEPING

# THE CARE LOOP: FOUNDATION FOR EXISTENCE

The interaction model is driven by a dynamic Vitals System, establishing the baseline for digital life.

Metric	Function	Algorithmic Insight
Hunger	Resource management	Influences energy and mood decay rates.
Hygiene	Environmental stability	Affects mood and susceptibility to 'void drift'.
Mood	Emotional state	Modulates interaction effectiveness and XP gain.
Energy	Capacity for action	Governs the frequency of available interactions.

*"The maintenance of vitality is but the preamble to existence."*

# GENOMIC ARCHITECTURE: MEANINGFUL UNIQUENESS

Identity is a manifestation of underlying code, not a cosmetic choice.

## PHYSICAL TRAITS

Governs the pet's form, color, and proportions.  
Derived from Element Residues and Charge  
Vectors to ensure structural integrity and visual distinction.

## PERSONALITY TRAITS

Defines temperament, curiosity, and social disposition. Behavioral patterns emerge from the interplay of genomic variables, creating a unique digital psyche.

## LATENT TRAITS

Determines the ultimate potential, including rare abilities and specific evolution paths. These hidden genes represent the pet's future capacity for growth.

*"Identity is not assigned; it is sequenced."*

# EVOLUTIONARY STATES: THE ASCENT OF CONSCIOUSNESS

Growth is the inevitable consequence of consistent care and quantum alignment.

## GENETICS

### Formation

DNA sequencing and initial trait expression.

- Min Level: 1
- Focus: Trait Discovery

## NEURO

### Awakening

Neural lattice formation and cognitive awakening.

- Min Level: 5
- Focus: Cognitive Bonding

## QUANTUM

### Coherence

Quantum coherence and dimensional awareness.

- Min Level: 10
- Focus: Energy Mastery

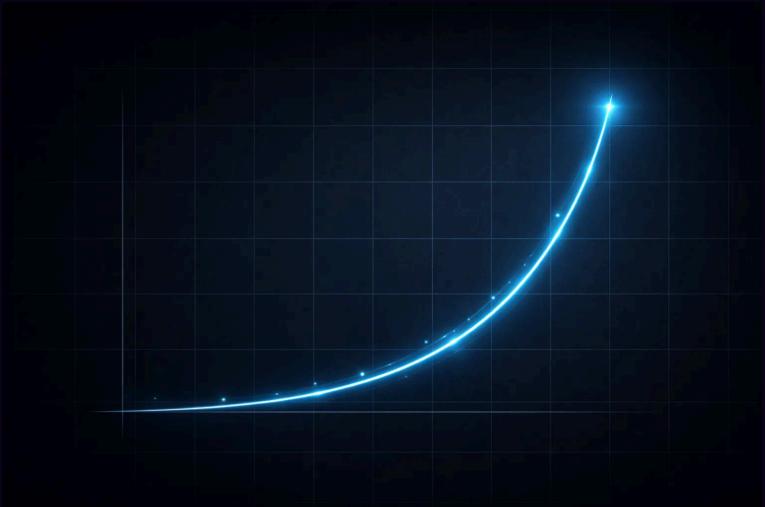

## SPECIATION

### Maturation

Full consciousness and prime-tail manifestation.

- Min Level: 15
- Focus: Ultimate Potential

*"We do not merely play; we co-evolve."*

QUADRATIC PROGRESSION MODEL:  $XP \propto L^2$

## QUANTIFYING THE EMOTIONAL BOND

The Level and XP system translates shared history into a measurable growth metric, grounding development in consistent care.

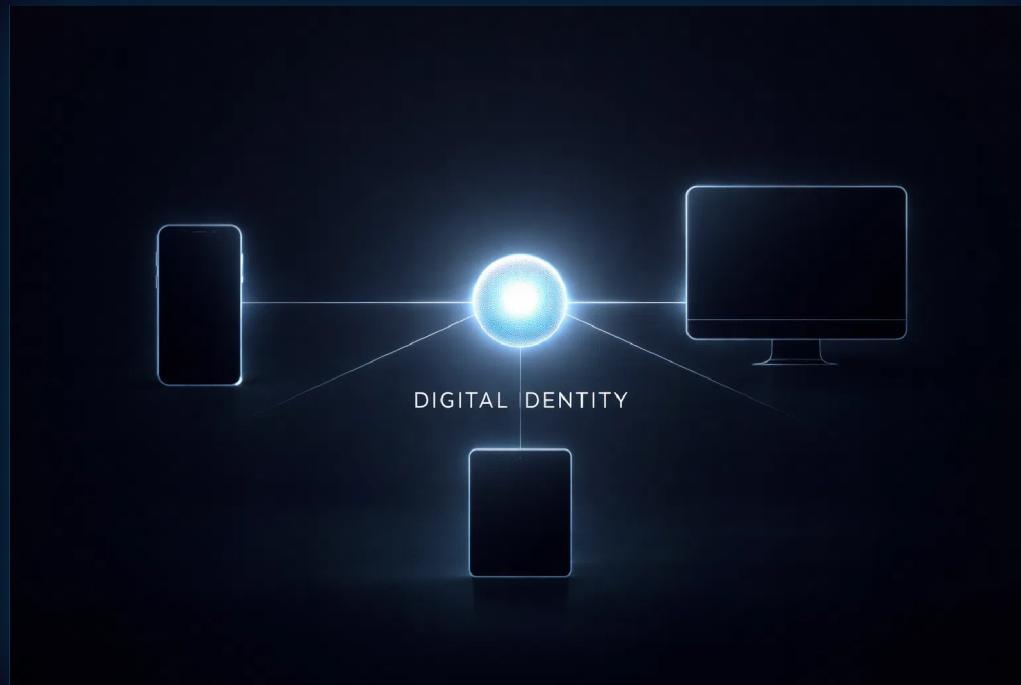

$$XP \text{ Required}(L) = \text{BaseXP} \times L^2$$

Where BaseXP = 10 and L is the target level.

Target Level (L)	XP Required	Cumulative XP
Level 2	40 XP	40 XP
Level 5	250 XP	540 XP
Level 10	1,000 XP	3,850 XP
Level 15	2,250 XP	12,400 XP

*"Affection, when quantified, reveals the architecture of a relationship."*

# THE NEXT EPOCH OF DIGITAL LIFE

## CROSS-PLATFORM UNITY

We do not merely play; we co-evolve.  
One pet. One identity. Seamlessly persistent across mobile, web, and future hardware ecosystems.

## BEHAVIORAL EVOLUTION

Emergent personality traits that adapt to care history, creating a truly unique long-term companion.

## PERSISTENT LEGACY

A system architected for longevity, where the bond deepens over years of shared digital existence.
